

Gasteiger, Johann (ed.)

## **Handbook of Chemoinformatics** - From Data to Knowledge

1. Edition - August 2003

599.- Euro / 886.- SFR, subscription price valid until 30. September 2003

699.- Euro / 1034.- SFR

2003. LX, 1870 Pages, 4 Volumes, Hardcover

ISBN 3-527-30680-3 - Wiley-VCH, Weinheim

### **Short description**

This four-volume work sets the standard in its comprehensive coverage of this rapidly developing field. Readers learn the material in all its depth and scope, from the basics, via data preparation, right up to applications - backed throughout by numerous real-life examples.

### **From the contents**

#### **VOLUME I**

Introduction

History of Chemoinformatics

Representation of Molecular Structures

Chemical Nomenclature and Structure Representation

Processing Constitutional Information

Representation of 3D Structures

Molecular Shape Analysis

Representation of Chemical Reactions

#### **VOLUME II**

Data Types

Data Acquisition

Databases of Chemical Structures

Databases on Chemical Reactions

Spectroscopic Databases

Chemistry in the Internet

Search Methods

#### **VOLUME III**

Calculation of Physical and Chemical Data

Molecular Mechanics

Quantum Mechanics

Descriptors for Chemical Compounds

Methods for Data Analysis

Expert Systems in Chemistry

#### **VOLUME IV**

Prediction of Physical and Chemical Properties

Structure-Spectra Correlations

Chemical Reactions and Synthesis Design

Drug Design

Chemoinformatics/Bioinformatics

Future Directions

Appendices
